El de generar texto tuve que ponerle texto en inglés ya que si lo ponía en español al ser gpt-2 parecía generar algo parecido a lorem ipsum

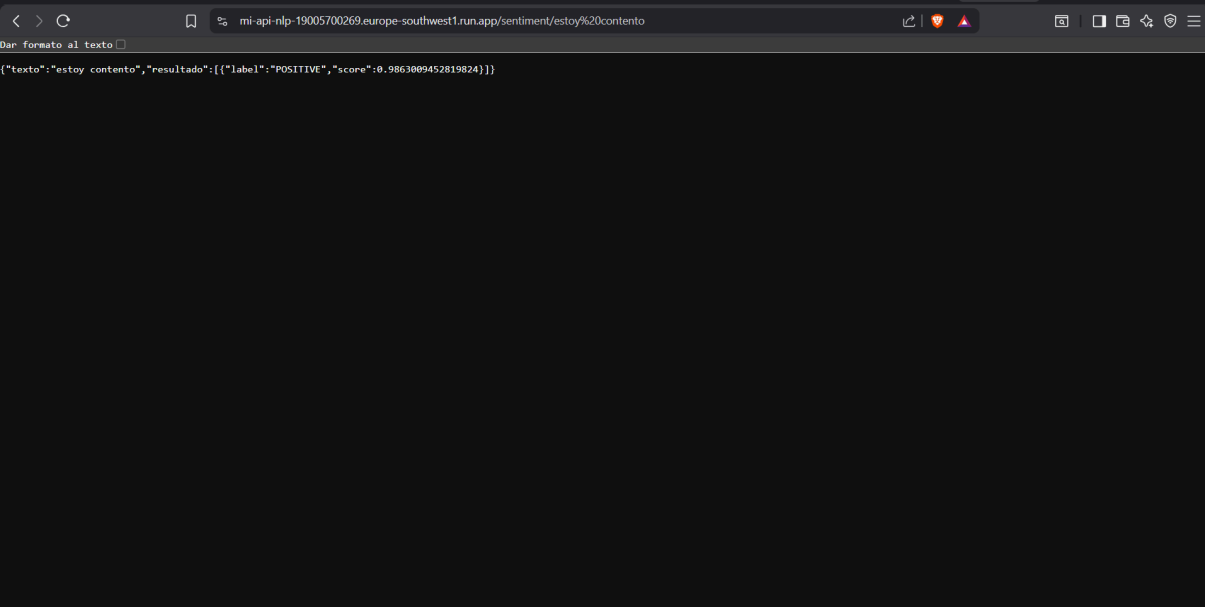

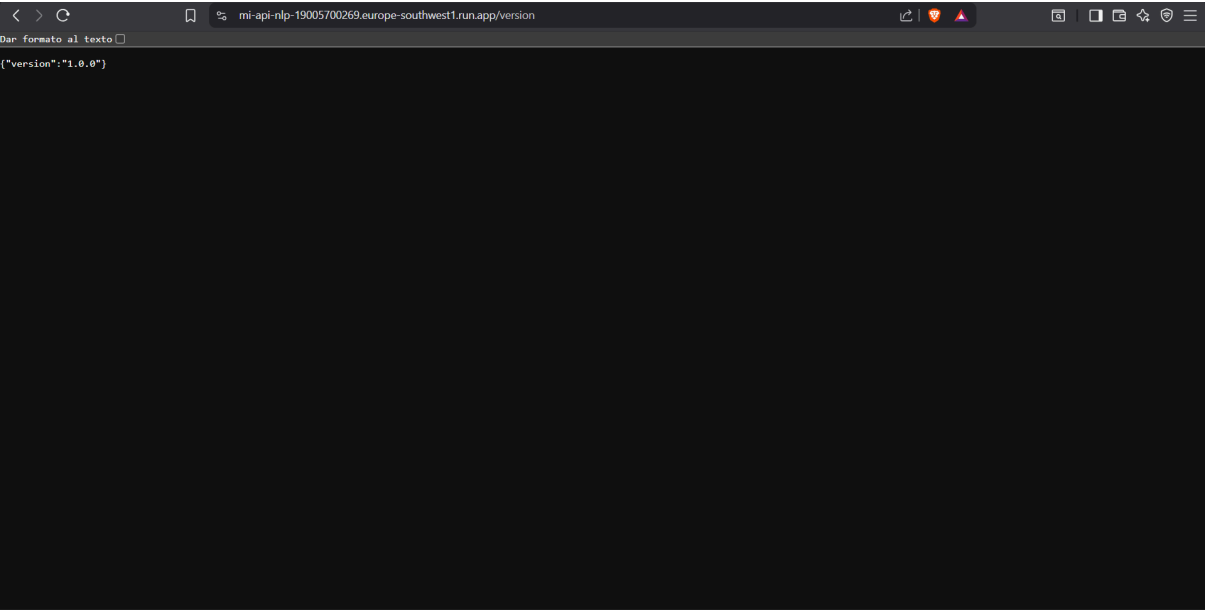

3 y 5.

Decidí juntar los puntos y hacer un despliegue en cloud de mi api y probar las llamadas https desde ahí directamente.

A screenshot of a web browser window. The address bar shows the URL "mi-api-nlp-19005700269.europe-southwest1.run.app/generar/goodbye". The browser's developer tools are open, showing the "Console" tab. The console output displays a JSON object: {"texto_generado": "goodbye to the man who left me with all this money, the man who won't be able to keep my job, the man who got me a job, the man who got me a better job and now I'm just getting beat up with a top, I'm just waiting for someone to come home on Friday and arrest me," Sanders said. "And I'm not doing it." "The Vermont senator said he was angry that his wife, Jane, who was still at work at the time of the attack, was not allowed to return home to Burlington to visit her daughter." "I was furious that she was not allowed to return home to make a point of her life for someone else," Sanders said, adding that he was "not going to let this happen again." "Sanders also pledged to continue working to strengthen the economy, a pledge he made when he ran for president in 2008." "The economy is strong, the middle class is growing, we're on track to secure another great economic deal for the middle class," Sanders said. "We must make sure that we are going to pay for this with a minimum wage that is going to make this economy grow again and that we are going to make sure that our children have a more secure"} The text is displayed in a dark-themed terminal window.
